MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

April-June, 1910

WASHINGTON
GOVERNMENT PRINTING OFFICE
1910

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption.* The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports.* The official values of the articles therein represented are the same as the *import values.*

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

DISTRICT.	Port of entry.	DISTRICT.	Port of entry.	DISTRICT.	Port of entry.

TONNAGE MOVEMENT IN THE TRADE OF THE UNITED STATES WITH ITS NONCONTIGUOUS TERRITORIES.

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

APRIL SUMMARY OF INTERNAL TRADE MOVEMENTS.

The summary of Internal Commerce for April, 1910, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for April and the four months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Thirty-five different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for April and four months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for April and four months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business; i. e., quantities actually unloaded at local elevators or warehouses and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments, in some cities—all quantities forwarded or rebilled, even if not unloaded, and in other cities—shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of April and four months ending with April. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of April transactions at 123 ports of receipts and 168 ports of shipment were reported. The number of vessels arriving in April was 4,266, and the departures numbered 4,744 vessels. The registered tonnage for the month was as follows: Arrivals, 4,873,506 net tons; departures, 6,022,539 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, APRIL AND FOUR MONTHS ENDING APRIL, 1908–1910.

A summary of the lake traffic for April, compared with the corresponding months in 1908 and 1909, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. April receipts in 1910 at all ports reporting were 2,858,951 net tons, compared with 863,106 net tons in April, 1909, and 508,198 net tons in April, 1908. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

[a] See page 1918 for itemized list of ports represented.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in April, 1910, consisted of the following: Receipts at Chicago—South Chicago, 2,944 net tons unclassed freight; Conneaut, 9 M feet lumber; Gladstone, 538 net tons unclassed freight; and Milwaukee 1,110 net tons unclassed freight. Shipments from Chicago—South Chicago, 21 net tons flour, 644,377 bushels corn, and 679 net tons unclassed freight, and Conneaut, 828 net tons soft coal, and 193 net tons iron manufactures.

The total "in-transit" movement for April was 193 net tons iron manufactures, 828 net tons soft coal, 21 net tons flour, 644,377 bushels corn, and 679 net tons unclassed freight.

During April, 1910, there were inspected into vessels at Chicago, as reported by the state grain inspector, 3,117,771 bushels of grain, composed of 537,938 bushels wheat and 2,579,833 bushels corn. During April, 1909, there were inspected 1,400,469 bushels of grain, of which 203,302 bushels were wheat and 1,197,167 bushels were corn.

RECEIPTS AND SHIPMENTS AT MINOR LAKE PORTS FOR THE MONTH OF APRIL, 1910.

The receipts and shipments at minor lake ports for April, 1910, show 86 different receiving ports and 130 different shipping ports. These, together with the 37 ports of receipt and 38 ports of shipment in the detailed statement, make 123 ports of receipt and 168 ports of shipment reporting during April.

The receipts consisted of iron ore, 42,325 gross tons; iron manufactures, 14 net tons; hard coal, 14,424 net tons; soft coal, 43,047 net tons; salt, 3,071 net tons; lumber, 3,402,000 feet; flour, 16 net tons; oats, 650 bushels; and unclassed freight, 75,475 net tons. These receipts reduced to net tons make a total of 190,265.

The shipments were: Iron ore, 62,605 gross tons; iron manufactures, 30 net tons; hard coal, 3,369 net tons; soft coal, 1,728 net tons; bunker coal, 20,957 net tons; salt, 3,100 net tons; copper, 6,198 net tons; lumber, 35,097,000 feet; flour, 15 bushels; oats, 775 bushels; rye, 300 bushels; and unclassed freight, 270,308 net tons. These shipments reduced to net tons make a total of 446,115.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets, during April and four months ending April, 1908, 1909, and 1910. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin, and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years to the end of March. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

Sight Receipts, Port Receipts, Overland Movement, and Distribution of Cotton, September 1 to April 30, 1908–1910.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood-lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments by water from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

Shipments of Redwood Lumber from Upper California, by Destinations, April and Four Months, 1908–1910.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the four months ending with April, 1910, of the vessels reported 402 were loaded with coal; 174 carried lumber, logs, piling, and wood; 87 carried ties; 161 carried merchandise; 12, brick; 14, steel; and 2, molasses.

Movement of Vessels via Cairo, Ill., at Ohio and Mississippi River Ports, April and Four Months ending April, 1908, 1909, and 1910.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 5,244 net tons mined in the first and second pools, makes a total coal traffic of 232,524 tons. This total, plus 11,655 tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic during April, 1910—244,179 tons.

The total freight moved in both directions, on this basis of calculation, was 372,564 net tons in April, 1910, as against 1,069,145 net tons in April, 1909, and 416,083 net tons in April, 1908.

For four months ending with April the total movement was 3,393,546 tons in 1910, 3,898,297 tons in 1909, and 3,139,436 tons in 1908. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in April amounted to 128,385 tons.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

IX.—OCEAN FREIGHT RATES.

The monthly range in ocean freight rates on staple products, for comparative periods of two years, between important Atlantic and Gulf ports and Europe, is shown in tables for Boston, New York, Baltimore, and New Orleans. In the Baltimore table, unless otherwise specified, rates in United States currency are in cents per 100 pounds, and those in English sterling per gross ton of 2,240 pounds.

Range of Ocean Freight Rates from New York, N. Y., to European Ports during April, 1909 and 1910.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

MAY, 1910

GOVERNMENT PRINTING OFFICE

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General Imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption.* The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports.* The official values of the articles therein represented are the same as the *import values.*

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

Morris Jacobson, *Internal Commerce Expert.*

MAY SUMMARY OF INTERNAL TRADE MOVEMENTS.

The summary of Internal Commerce for May, 1910, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for May and the five months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Thirty-five different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

Comparative Statement of Cars Handled by Car-Service Associations and Demurrage Bureaus during May and Five Months ending May, 1908–1910.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for May and five months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

This movement includes receipts and shipments for May and five months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

Commercial Movements of Live Stock at Interior Markets during May and Five Months ending May, 1908–1910.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville make a strict distinction between purely local business; i. e., quantities actually unloaded at local elevators or warehouses and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments, in some cities—all quantities forwarded or rebilled, even if not unloaded, and in other cities—shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of May and five months ending with May. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of May transactions at 153 ports of receipt and 217 ports of shipment were reported. The number of vessels arriving in May was 8,457 and the departures numbered 8,506 vessels. The registered tonnage for the month was as follows: Arrivals, 13,286,704 net tons; departures, 13,429,098 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, MAY AND FIVE MONTHS ENDING MAY, 1908–1910.

A summary of the lake traffic for May, compared with the corresponding months in 1908 and 1909, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. May receipts in 1910 at all ports reporting were 10,798,551 net tons, compared with 6,047,398 net tons in May, 1909, and 2,561,409 net tons in May, 1908. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

[a] Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at lake ports, see page 2103.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in May, 1910, consisted of the following: Receipts at Chicago-South Chicago, 5,018 net tons unclassed freight; Conneaut, 9,000 feet lumber and 20 net tons flour; Gladstone, 776 net tons unclassed freight; and Milwaukee, 2,150 net tons unclassed freight. Shipments from Chicago-South Chicago, 240 net tons flour, 476,627 bushels corn, and 1,245 net tons unclassed freight; Conneaut, 247 net tons soft coal, and 2,221 net tons iron manufactures; and Superior, 195,211 bushels wheat and 316,685 bushels oats.

The total "in-transit" movement for May was 2,221 net tons iron manufactures, 247 net tons soft coal, 9,000 feet lumber, 260 net tons flour, 195,211 bushels wheat, 476,627 bushels corn, 316,685 bushels oats, and 1,245 net tons unclassed freight.

During May, 1910, there were inspected into vessels at Chicago, as reported by the state grain inspector, 3,591,336 bushels of grain, composed of 3,461,801 bushels corn, 110,342 bushels oats, and 19,193 bushels barley. During May, 1909, there were inspected 3,048,320 bushels of grain, composed of 590,933 bushels wheat, 1,948,140 bushels corn, 489,247 bushels oats, and 20,000 bushels rye.

During the season ending May 31, 1910, the total quantity of grain inspected before loading into vessels was 6,709,107 bushels, as compared with 4,448,789 bushels during the same period in 1909.

Domestic Receipts and Shipments, at Principal Ports, of Commodities Transported on the Great Lakes, May and Five months ending May, 1909 and 1910.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets, during May and five months ending May, 1908, 1909, and 1910. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin, and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years to the end of May. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

Sight Receipts, Port Receipts, Overland Movement, and Distribution of Cotton, September 1 to May 31, 1908–1910.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood-lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the five months ending with May, 1910, of the vessels reported 517 were loaded with coal; 210 carried lumber, logs, piling, and wood; 111 carried ties; 219 carried merchandise; 13, brick; 14, steel; 1, corn, and 2, molasses.

Movement of Vessels via Cairo, Ill., at Ohio and Mississippi River Ports, May and Five Months ending May, 1908, 1909, and 1910.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 37,028 net tons mined in the first and second pools, makes a total coal traffic of 935,028 tons. This total plus 12,026 tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic during May, 1910—947,054 tons.

The total freight moved in both directions, on this basis of calculation, was 1,085,938 net tons in May, 1910, as against 1,155,514 net tons in May, 1909, and 1,150,993 net tons in May, 1908.

For five months ending with May the total movement was 4,479,484 tons in 1910, 5,053,811 tons in 1909, and 4,290,429 tons in 1908. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in May amounted to 138,884 tons.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No changes in railroad freight rates were reported by the Interstate Commerce Commission for the month of May, 1910.

No. 12. SERIES 1909-1910

MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

JUNE, 1910

WASHINGTON
GOVERNMENT PRINTING OFFICE
1910

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption.* The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports.* The official values of the articles therein represented are the same as the *import values.*

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

The reports of this Bureau are supplied to applicants without expense so long as the editions allowed for distribution will permit, upon application to "Chief of the Bureau of Statistics, Department of Commerce and Labor, Washington, D. C.," and can be purchased at a small price by application to the "Superintendent of Documents, Office of Public Printer, Washington, D. C."

As the demand on the part of the public for the reports of the Bureau is beyond its ability to supply, persons to whom they are regularly sent having no further use for them are requested to notify this Bureau of their willingness to dispense with them. The Bureau will be glad to receive such copies of its publications as have been sent to parties who do not care to retain them, and upon receipt of notice of willingness to return such copies franked mailing slips will be forwarded for that purpose; but one frank is required for each package, which may contain several copies, if the package does not exceed 4 pounds in weight. *Notify the Bureau promptly of change of address.*

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

JUNE SUMMARY OF INTERNAL TRADE MOVEMENTS.

The summary of Internal Commerce for June, 1910, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for June and the six months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Thirty-five different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for June and six months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

This movement includes receipts and shipments for June and six months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville make a strict distinction between purely local business, i. e., quantities actually unloaded at local elevators or warehouses and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments, in some cities—all quantities forwarded or rebilled, even if not unloaded, and in other cities—shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

II.—DOMESTIC COMMERCE OF THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of June and six months ending with June. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs. During the month of June transactions at 154 ports of receipt and 221 ports of shipment were reported. The number of vessels arriving in June was 10,284, and the departures numbered 10,384 vessels. The registered tonnage for the month was as follows: Arrivals, 15,760,773 net tons; departures, 15,974,363 net tons. Totals exclusive of tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, JUNE AND SIX MONTHS ENDING JUNE, 1908–1910.

A summary of the lake traffic for June, compared with the corresponding months in 1908 and 1909, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. June receipts in 1910 at all ports reporting were 12,787,023 net tons, compared with 9,496,348 net tons in June, 1909, and 6,319,139 net tons in June, 1908. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

[a] Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at lake ports, see page 2311.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in June, 1910, consisted of the following: Receipts at Chicago-South Chicago, 6,655 net tons unclassed freight; Conneaut, 20 net tons flour; and Milwaukee, 2,429 net tons unclassed freight. Shipments from Ashtabula, 400 bushels corn, 105 bushels oats, and 37 net tons unclassed freight; Chicago-South Chicago, 114 net tons flour, 946,968 bushels corn, and 652 net tons unclassed freight; Conneaut, 632 net tons soft coal, 1,291 net tons iron manufactures, and 5 net tons unclassed freight.

The total "in-transit" movement for June was 1,291 net tons iron manufactures, 632 net tons soft coal, 134 net tons flour, 947,368 bushels corn, 105 bushels oats, and 9,778 net tons unclassed freight.

During June, 1910, there were inspected into vessels at Chicago, as reported by the state grain inspector, 5,989,336 bushels of grain, composed of 1,085,572 bushels wheat, 4,841,064 bushels corn, and 62,700 bushels oats. During June, 1909, there were inspected 6,072,642 bushels of grain, composed of 1,216,542 bushels wheat, 4,720,963 bushels corn, 94,000 bushels oats, and 41,137 bushels barley.

During the season ending June 30, 1910, the total quantity of grain inspected before loading into vessels was 12,698,443 bushels, as compared with 10,521,431 bushels during the same period in 1909.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets, during June and six months ending June, 1908, 1909, and 1910. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin, and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement has been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia, shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years to the end of June. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

Sight Receipts, Port Receipts, Overland Movement, and Distribution of Cotton, September 1 to June 30, 1908–1910.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood-lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the six months ending with June, 1910, of the vessels reported 894 were loaded with coal; 252 carried lumber, logs, piling, and wood; 138 carried ties; 271 carried merchandise; 15, brick; 22, oil; 14, steel; 1, corn; 22, rock; and 2, molasses.

Movement of Vessels via Cairo, Ill., at Ohio and Mississippi River Ports, June and Six Months ending June, 1908, 1909, and 1910.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 45,403 net tons mined in the first and second pools, makes a total coal traffic of 988,983 tons. This total, plus 2,463 tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic during June, 1910—991,446 tons.

The total freight moved in both directions, on this basis of calculation, was 1,090,057 net tons in June, 1910, as against 943,892 net tons in June, 1909, and 839,648 net tons in June, 1908.

For six months ending with June the total movement was 5,569,541 tons in 1910, 5,997,703 tons in 1909, and 5,130,077 tons in 1908. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in June amounted to 98,611 tons.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig iron production by principal districts. They include shipments of anthracite coal from the eastern anthracite region, shipments of anthracite and bituminous coal and coke east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads; weekly Connnellsville coke output and shipments; Boston and St. Louis receipts of coal. Petroleum statistics include operations in the pipeline territory in the Appalachian, Lima-Indiana, and Mid-Continent fields, also coastwise shipments from Port Arthur and Sabine, Tex. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not bo taken to indicato that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No changes in railroad freight rates were reported by the Interstate Commerce Commission for the month of June, 1910.
